VILE CTOREEDONE FUNCTIONALITIES	
VUE STOREFRONT FUNCTIONALITIES	
HOMEPAGE FUNCTIONALITIES	_
VUE STOREFRINT BUTTON	
Clicking in VUE STOREFRONT Button on homepage opens a new tab with same webpage of same company websites	
CATEGORIES BUTTON / PRODUCT LSITINGS	_
Clicking in categories button opens a new tab with various products and "Latest" products are autoselected and shown at start	
These are number of products present in all Categories	
NEW (24)	
Women (1921)	
Men (633)	
Accessories (135)	
Sale (1432)	
These are all sorting categories based on user search habits and price requirements	_
Latest	
Relevance	
Price from low to high	
Price from high to low	
Sizes	
There are 92 different sizes available with 15 most used sizes shown immediately and others display after clicking on "Show More"	_
Color	_
There are 18 different colors present in this section	
SEARCH BAR	_
The search bar at the top aids in searching any product. Product related to that "keyword" will be displayed with "latest" selected automatically

 54
55

There is a downside that search bar does not show any suggestions based on what is trending or what other buyers mostly search

There is a downside that you don't know exact keywords all the time and this hinders you to find the best product acc to your requirements

SHOPPING CART

When you click on cart button, it displayes your card is empty

There is a downside that it should show some products or some inks to start shopping again

Since when user see this page, and nothing comes up, user will most probably end up closing the website or buying nothing

BROWSE DEALS

There is a browse deal button which take you to the next tab with and shows "All shoes (118)" on this new webpage

There is one error showing "Something went wrong" after few seconds on this page

There is also one downside that only shoes are selected in browse deals

This will make user think that this is mostly related to shoes and other ecommerce products are not their main domain

This narrowing will reduce the number of traffic and other potential buyers who don't like shoes or snicker much, will buy nothing

SHOE PHOTO

Resolution of this photo is not upto the mark

There is no link attached with this photo

Better way is that it should be linked so that when clicks this photo, shoe section will be open and this advertised shoe sould also be there in case someone wants to

SHOP BY CATEGORY

The photo for the "New" section is blurry and does not represent any clear meaning

NEW COLLECTION (FRESH AND BOLD)

When u click this button, Clothing, Shoes and Bags with latest products are shown on new webpage

DESIGNER SUNGLASSES

There is an issue in this section that when u click this button, only glasses for womens are shown and this discriminates the "mens" in this category.

Men glasses should be added too to keep the balance

Only 4 glasses with only one size is present in this section

GEAR UP AND GET READY

This section has appropriate (779) products available on this new webpage

But it also has same issue that only bags for women are present there and men and childrens are not catored in these sections

INSPIRED BY YOUR PICKS

This shows relevan product bases on your searching pattern

This section is OK except these should show more number of products, only 6-7 products are shown

This does not gravitates someone to that extent to end up buying products

WISHLIST

I did not find wishlist which is major missing

HOMEPAGE	
Clicking on "THE DEMO SITE" logo opens the same webpage in new tab	
About section	
Opens a new tab with empty space	
(Insert a short bio here) also does not allow to do anything	
Read More text also have no fuctionality	
Uncategorized text will open uncategorized weboages in about section	
CONTACT SECTION	
A new webpage opens	
First Name, Last Name, Email , Message required	
Except Email section, you cannot leave that spaces empty but you can write anything	
In Email section you have to write something before "@" and after "@"	
It does not show error that it hsould be @gmail.com in the end or anything like that	
It show suggestion in light text to show format of email provided	
Form has been sent successfully shows after all this	
SOCIAL MEDIA HANDLES	
None of them is working and few are missing too	
BLOGS WEBPAGE	
When u click on any blog, a new webpage appears.	
On homepage, few lines of summary is also written below title of Blog	
Title of each blog has 1 word is common which makes title very cliché and humdrum (Web3)	
Yes website is related to web3, but all titles on all 4 pages should not include same word and all titles are also very similar	
SINGLE BLOG WEBPAGE

Decentralized Content Storage: Storing blog posts and media on decentralized networks like IPFS or Swarm to ensure data availability and censorship resistance.
Blockchain-based Identity and Authentication: Implementing decentralized identity solutions, such as blockchain-based logins or Web3 wallets, for secure user authe
Immutable Content: Using blockchain technology to timestamp and record blog posts, making the content immutable and verifiable.
Cryptocurrency Payments: Allowing cryptocurrency payments for subscriptions, access to premium content, or donations to authors.
Tokenized Content: Tokenizing blog content to create unique digital assets representing ownership or access rights to specific posts.
Decentralized Commenting System: Implementing a commenting system using decentralized protocols to enhance user privacy and prevent censorship.
Content Curation and Moderation: Utilizing decentralized governance mechanisms for community-based content curation and moderation.
Smart Contracts for Licensing and Copyright: Enabling authors to define licensing terms and copyright protection using smart contracts.
Decentralized Analytics: Using decentralized analytics solutions to track website usage while respecting user privacy.
Integration with Web3 Wallets: Allowing users to interact with the blog using their Web3 wallets for seamless transactions and interactions.
Interoperability with Other Web3 Applications: Building the blog to interact with other decentralized applications (dApps) and blockchain ecosystems.
Decentralized Governance: Involving token holders or active community members in the governance and decision-making processes for the platform's development.
Micropayments for Content Consumption: Implementing micropayments to allow users to pay small amounts for individual blog posts or sections.
Decentralized Advertising: Exploring options for decentralized advertising models to avoid middlemen and protect user data.
Web3 Social Sharing: Allowing users to share blog posts on decentralized social media platforms.
Blockchain-based Reputation System: Implementing a reputation system on the blockchain to reward quality content and discourage spam.
Decentralized Backup and Recovery: Providing options for users to create decentralized backups of their content and data.
Web3 Plugins and Extensions: Allowing developers to create and integrate Web3 plugins and extensions to enhance the blog's functionalities.
Decentralized Subscription Model: Offering subscription plans through smart contracts, enabling users to manage payments autonomously.
Decentralized Translation and Localization: Facilitating community-driven translation and localization efforts using blockchain-based incentives.

on.
